PROFESSIONAL SUMMARY

Results-driven aspiring Data Analyst with hands-on project experience in SQL (MySQL), Power BI, Python and MS Excel. Proficient in data cleaning, ETL pipelines, DAX measure development, and interactive dashboard design. Demonstrated ability to extract actionable business insights from large datasets (700K+ records). Eager to leverage analytical and visualization skills to drive data-informed decisions in a professional analytics role.

TECHNICAL SKILLS

SQL (MySQL): Queries, Subqueries, Joins, CTEs, Window Functions, Aggregate Functions, Data Cleaning

Python: Pandas, NumPy, Data Cleaning, Data Transformation, Feature Engineering

Power BI: Power Query, Data Modelling, DAX, KPI Development, Interactive Dashboards, Power BI Service, ETL

MS Excel: Pivot Tables, Pivot Charts, VLOOKUP / XLOOKUP, Power Query, Advanced Formulas, Data Reporting

Other: Data Transformation, Data Cleaning & Validation, Business Reporting, Jupyter Notebook Tally ERP

PROJECTS

Spotify Music Analysis Dashboard *(SQL · MySQL · Power BI)*

- Analysed 85,000+ music records to identify trends in track popularity, artist performance, and album distribution
- Performed data cleaning and transformation using **SQL Joins, Subqueries, and Aggregate Functions** in MySQL
- Engineered 4+ DAX KPI measures including highest-popularity track, average popularity, total artists, and total albums
- Built an interactive Power BI dashboard with 3+ visuals and dynamic slicers enabling multi-dimensional trend analysis

Retail Sales Analysis *(SQL · MySQL)*

- Processed and analysed **700,000+ retail transaction records** to uncover customer behaviour and sales trends
- Conducted thorough data cleaning: handled missing values, invalid records, and inconsistent data entries
- Applied advanced SQL — **CTEs, Window Functions, Joins, and Aggregate Functions** — for cohort and trend analysis
- Derived insights on monthly revenue trends, top-revenue customers, and customer retention patterns

Customer Shopping Behavior Analysis *(Python | MySQL | Power BI)*

- Cleaned and transformed data using Python (Pandas), handled missing values, and created features such as age groups and purchase-frequency metrics.
- Built **9+ SQL queries** using **CTEs, subqueries, CASE statements, aggregate functions, and window functions** to answer business questions and rank products across categories.
- Created **3 customer segments** (New, Returning, Loyal), identified **Top 5 products** by review ratings and discount usage, and ranked the **Top 3 products within each category**.

WORK EXPERIENCE

Accounts Executive | Arindam Software Solutions (India) Pvt Ltd

Jun 2025 – Feb 2026

- Managed financial records and end-to-end invoice processing using **Tally ERP**
- Maintained and organized transactional reports and reconciliation sheets in **MS Excel**, ensuring data accuracy
- Assisted in account reconciliation workflows, identifying and resolving data discrepancies in daily operations.
